

Today I will **classify real numbers** using vocabulary scavenger hunt and diagram.

I can speak about real numbers using: set, subset, natural numbers, whole numbers, integers, rational numbers, and irrational numbers.

$$\sqrt{1} = 1 \quad \sqrt{69} = 13. \dots \quad \sqrt{25} = 5$$

$$\sqrt{196} = 14 \quad 3.1956 \dots \quad -\sqrt{81} = -9$$

~~$$\sqrt{-81}$$~~
